(57) **ABSTRACT**

A computer-implemented method, including processing, with a processor, a request by a person or entity to access, obtain, change, alter, or modify, an individual's or patient's healthcare record or file which contains healthcare information or healthcare-related information personal to the individual or patient, generating a message containing information regarding the person or entity and/or identification information regarding the person or entity, and containing an actual change, alteration, or modification, sought to be made or made to the individual's or patient's healthcare record or file, and transmitting the message to a communication device of the individual or patient during, concurrently with, at a same time as, or prior to a completion of, an accessing, obtaining, changing, altering, or modifying, of the individual's or patient's healthcare record or file or a processing of the request.
